

Innova Energy acquires one of the largest UK roof solar arrays

1st August 2019

Innova Energy has now completed the acquisition of one of the largest single roof top solar arrays in the UK. The 1.56 MWp project installed at Greenyard Frozen's fresh vegetable processing facility in Boston, Lincolnshire was acquired from Millclose Solar Limited, a company under management by Armstrong Energy. Innova Capital provided due diligence and acquisition support on the transaction.

The project was accredited in 2016 at 1.5 ROCs and benefits from a PPA under which 100% of the power generated is used on site. The arrays comprise 6,141 ZNshine 255Wp monocrystalline solar modules on a Monsolar mounting structure and 2 x Ingeteam Ingecon Sun 805TL X420 inverters.

Mr Andrew Kaye, Co-founder and Director of Innova Energy commented:

"This purchase represents a major addition to our growing commercial roof top portfolio and our ongoing commitment to providing commercial customers with direct energy off-grid."
