

ISG Renewables energises Bicker Fen Solar Park in Lincolnshire.

Innova Press Release, 12th March 2024

Bicker Fen (previously [Manor Farm](#)), a 22.6MWp (24.2 GWh) solar park owned by ISG Renewables, an Innova and Schroders Greencoat joint venture, was successfully energised on Tuesday 12th March 2024.

The site, originally developed by Innova, was granted planning permission in May 2022 and awarded a Contract for Different (CfD) by the Department for Business, Energy and Industrial Strategy in their July 2022 auction. Innova's Delivery team managed the design, module procurement, and the EPC and ICP construction contracts.

Bicker Fen Solar Park was subsequently acquired by ISG Renewables in September 2023, as part of the joint venture's ambition to finance, construct, and operate 5GW of renewable energy capacity over the next three to five years.

Now energisation of the site is complete, it will be handed over to Innova's in-house asset management team to oversee its operation and maintenance alongside Carn Nicholas, which was acquired by ISG Renewables in February 2023.

Andrew Kaye, joint CEO and founder at Innova, said:

"After a successful construction period, we are delighted to have energised Bicker Fen Solar Park. The energy now being generated from Bicker Fen will be enough to power 2,266 households in the local area, and will save 5,020 tonnes of carbon each year, taking the UK another step towards Net Zero and reducing its reliance on fossil fuels.

"We look forward to seeing the positive impact Bicker Fen Solar Park has on the environment and local communities in the months and years to come, as well as continuing to strengthen and develop our relationship with Schroders Greencoat."

About Innova

Innova is a forward-thinking renewable energy business, employing over 120 people across two offices in London and Cheltenham. Innova's long-term mission is to create utility-scale renewable energy projects using multi-technologies that take large energy intensive users off-grid, positively improving the environment, and benefiting local businesses and communities.

Innova will achieve this mission by continuing to develop, build, and operate a range of innovative, environmentally sustainable, long-term renewable energy solutions. To date,

Innova has over 60 DNO and Grid connected sites under development in the UK, with a combined solar and storage capacity in excess of 24GW.

Innova offer an integrated approach to renewable energy developments and operations, with a capability across the life cycle of any project. This includes planning, grid connections, project rights development, financing, construction and asset management, power purchase agreements, and long-term operations.
