

# Next Steps

## Community Consultation and Pre-application with NNC – Current

We will consolidate the feedback from this consultation event and from the Council’s response to our pre-application request. This helps us to formulate our submission of the planning application.

### Environmental Surveys

#### Ongoing

We are undertaking our site-specific surveys and assessment work along with producing all of the technical documents required for our planning submission. The outcomes of these assessments, along with the feedback from this consultation will feed into the Site design.

### Planning Application Submission

#### February/March 2026

The planning application is expected to be submitted to North Northamptonshire Council in February/March 2026. We will work with the Council to deliver a timely decision on the application.

### Construction and Operation

#### One Year

We expect to receive a decision from the Council in late 2026, which will be subject to a five-year implementation period. The construction period is expected to take one year, and the proposed planting will be implemented in the first planting season following the construction activities. We are seeking a 40-year permission for the operational phase of the proposed development.
