

# Enhancements and Benefits

## Our Community Promise

We believe it is important that local communities share in the benefit our project brings. For all of our solar and storage projects, we offer a community benefit fund which can be used to support local projects and priorities. We will work with our host communities to agree the best way to provide and administer the fund.

Every year, the 99.9MW solar Desborough Airfield Solar Site will contribute £250 per MW of solar for the 50-year lifetime. Innova will also provide an annual charitable fund, where £100 per MW of solar will be provided to a chosen charity.

OUR COMMUNITY PROMISE

Every year the project will contribute

£50

To the local community

per MW of storage

£20

Charitable donation

£250

To the local community

per MW of solar

£100

Charitable donation

### Boosting Biodiversity

A bespoke Biodiversity Management Strategy is being prepared that ensures existing and new habitats are enhanced or created to benefit local wildlife.

Desborough Airfield Solar Site’s landscaping planning, seeding and habitat creation plans will focus on native species. These initiatives will contribute to securing long term biodiversity net gain across the site.

### Green Spaces

The solar farm has been designed to leave green spaces around the site boundaries and between the rows of panels to avoid shading and maximise electricity generation. This will leave the majority of the solar array as uncovered grassland.
