

Innova are pleased to announce our most successful CfD auction to date.

19th March 2026

During the turbulence of connections reform, Innova have received contracts for 9 DNO solar sites delivering c.358MWp. This brings total CfDs awarded to Innova across 3 auctions, AR4, AR6 and AR7a to 18 sites and 562MWp.

This year marks a 50% increase in successful applications year on year, a testament to the strong pipeline we have built over the last 5 years.

About Innova

Innova is a forward-thinking energy business with offices in London and Cheltenham, and over a decade of experience in the UK energy sector. Innova's long-term mission is to develop, build, and operate a range of utility-scale, innovative, and environmentally sustainable energy solutions using multiple technologies.

Innova is one of the largest independent developers of renewable energy and data centres in the UK, with over 50 DNO- and transmission-connected sites under development or in operation across England and Wales. These sites represent a combined solar, storage, and data-centre capacity exceeding 12 GW.

The company offers an integrated approach to energy projects across the full lifecycle, including planning, grid connections, project rights development, financing, construction, asset management, power-purchase agreements, and long-term operations.
